

TECHNICAL SHEET

FORAGE SORGHUM – HUNNIGREEN

HIGHER QUALITY, SWEET GRAZING FOR LONGER

Hunnigreen is one of HSR Seeds top quality forage sorghums that will not flower until day length is less than 12 hours and 20 minutes. This means it will remain in the vegetative stage, still producing large amounts of quality leaf, when other quicker flowering competitor sweet sorghums have already started to run to head, also lessening the risk of ergot.

WHO SHOULD GROW HUNNIGREEN ?

Anyone seeking a highly palatable sweet forage that will not run to head quickly. Hunnigreen will stay leafier longer than some competitor varieties and lessen your risk of ergot.

- Sweet sorghum x sweet sorghum hybrid
- Suitable for grazing and hay making
- Excellent for silage
- Leafy with excellent palatability
- Excellent standover feed for late grazing into autumn and winter
- Late flowering reduces ergot risk
- Can be grazed all summer

GENETIC TYPE:	Sweet Sorghum by Sweet Sorghum
PLANTING TIME:	Spring to Summer
SOIL TEMP. AT PLANTING:	15 degrees C and rising
SEED SIZE / KG:	28,000 – 40,000
PLANTING RATE (KG / HA):	
MARGINAL DRYLAND:	4 to 7
GOOD DRYLAND:	8 to 12
IRRIGATION:	15 to 25
EARLY GRAZING:	Very Good
STAND OVER:	Excellent
HAY MAKING:	Good
GREEN CHOP:	Excellent
SILAGE – PIT	Excellent
SILAGE – PLASTIC WRAP	Excellent
