

## Sirus

Introducing HSR Seeds 117 day soft feed/silage corn. With a fantastic yield for its maturity, Sirus is a full season feed maize on the Australian market that can also be ensiled for stockfeed. It is designed principally for the grower who wants a large robust plant with an excellent grain to Stover ratio.

Can be grown from Central QLD through to the NSW/VIC border.

Growers seeking a reliable, high yielding, excellent standability and disease tolerant package in a full-maturing maize hybrid, should be growing *Sirus*. Producing high quality feed grain and silage yields. Farmers that want a stable hybrid that has performed exceptionally well across all environments should look at *Sirus*.

<b>Plant Type:</b>
<b>117 Days CRM Grain or Silage</b>
<b>Yield Potential:</b>
<b>Excellent yields with fantastic disease package.</b>
<b>Plant Height:</b>
<b>Very-Tall and erect plant with large root structure.</b>
<b>Grain Type:</b>
<b>Dent x Dent highly digestible feed grain. High Starch content</b>
<b>General Comments:</b>
<b>Shows excellent yields under various conditions.</b>
