

Amadeus IT

Introducing HSR Seeds 118 day CRM imi-tolerant corn. With a fantastic yield for its maturity, *Amadeus IT* is a full season flint 'gritting' maize on the Australian market with imi-herbicide tolerance. It is designed for the processing and speciality markets that require a deep yellow/orange hard textured grain.

Can be grown from Central QLD through to the NSW/VIC border.

Growers seeking a reliable, high yielding, excellent standability and disease tolerance in a full-maturing maize hybrid. Producing high quality 'gritting' grain and silage yields. Farmers that want a stable hybrid that has performed exceptionally well across all environments should look at *Amadeus IT*.

The flexibility in *Amadeus IT*, allows you to apply 'Lightning® Herbicide' over the plant for excellent and broad post-emergent broadleaf and grass weed control (Please read the label). *Amadeus IT* also allows you to go into double-cropping or re-cropping situations where you have soil residues of imi-herbicides.

Plant Type:
118 Days CRM Grain or Silage
Yield Potential:
Excellent yields with great disease package.
Plant Height:
Very-Tall and erect plant with large root structure.
Grain Type:
Large bright flint yellow/orange kernels. Ability to go 'gritting' quality for milling.
General Comments:
Zero plant-back interval. Multi-purpose end uses. Imazethapyr/Imazapyr tolerant.
