

Amadeus

Introducing HSR Seeds 118 day CRM corn. With a fantastic yield for its maturity, *Amadeus* is a full season flint 'gritting' maize on the Australian market. It is designed for the processing and speciality markets that require a deep yellow/orange hard textured grain.

Great grain yeild under stress. Ideal for high moisture grain as it thrashers well.

Can be grown from Central QLD through to the NSW/VIC border.

Growers seeking a reliable, high yielding, excellent standability and disease tolerance in a full-maturing maize hybrid. Producing high quality 'gritting' grain and silage yields. Farmers that want a stable hybrid that has performed exceptionally well across all environments should look at *Amadeus*.

Exceptional yield and grain size under stress.

Plant Type:
118 Days CRM Grain or Silage
Yield Potential:
Excellent yields with great disease package.
Plant Height:
Very-Tall and erect plant with large root structure.
Grain Type:
Large bright flint yellow/orange kernels. Ability to go 'gritting' quality for milling.
General Comments:
Highly adaptable.
