COMMENT	Exceptional yield of grain and silage for maturity. TAS grain. Double crop option.	High yielding grain and silage. Rapid drydown suits shorter seasons and double crop.	Quickest IT in Australia. Ideal for grain or silage in fields that have grass weed issues or IT residuality concerns.	Very Quick IT. Ideal for grain or silage in fields that have grass weed issues or IT residuality concerns	Improved silage and grain yield. High starch/ high ME. Quick dry-down, great as short season or second crop	Sets new standards for high grain and silage yield in this maturity.	Exceptional silage and grain yield. Excellent staygreen but with good grain drydown.	Exceptional Yield for maturity in both grain and silage. Very versatile under a wide range of conditions.	Strong IT, with great prime grain yields.	Full season grain yields, with exceptional grain quality which will grit. Versatile hybrid for silage and grain.	Grain and silage dual purpose Hybrid. Bred for yield, disease tolerance and stress adaptability.	This variety has exceptional disease and stress tolerance and large consistent grain size suitable for gritting.	The IT stress king. Exceptional stress tolerance to heat, drought and disease. Holds grit grain size and quality under extreme stress.	Ideal whole crop silage or grazing. Early plant cold tolerance, preferred over forage sorghum. Higher ME and yields. Does not regrow after grazing.
KEY:	Rating Scale 1-9 1 = Poor, 9 = Excellent

HSR Pty Ltd sells seed to customers based on a limitation of liability. We warrant it is within recognised tolerances. In the event there is a breach of that warranty our liability extends to the replacement cost of the seed. We provide advice, however recommend that you seek local, expert advice regarding any crop agronomy decisions. We make variety recommendations and whilst we do extensive testing, we advise customers to test varieties under local conditions prior to large scale adoption.
