

# Ceres (205/251) NEW

**Ceres** is our new high yielding 115 CRM grain and silage dual purpose hybrid.

Bred for yield, strong vigor and disease tolerance.

**Ceres** has long cobs of high quality grain and can offer top end yield under both dryland and irrigated conditions.

**Ceres** produces large Prime Grain, ideal for stockfeed, silage and export. **Ceres** shows potential for gritting.

**Ceres** offers an excellent disease tolerance package - rating very high in leaf blight, cob rot and rust.

Widely tested over a number of seasons. It has shown top end yield in this mid maturity group.

**Ceres** offers a wide area of adaptability from southern Queensland areas through to southern New South Wales/ northern Victoria districts.

<b>Plant Type:</b>
<b>115 Days CRM Grain and Silage - potential for processing.</b>
<b>Yield Potential:</b>
<b>Excellent yields with strong disease package.</b>
<b>Plant Height:</b>
<b>Medium tall and robust plant structure. Very leafy.</b>
<b>Grain Type:</b>
<b>Large Prime grain, Dent x Flint Holds grain size under stress.</b>
<b>General Comments:</b>
<b>Strong vigorous hybrid offering excellent yield performance.</b>

## PLANTING POPULATIONS

Dryland below 600mm	Dryland above 600mm	Full Irrigation
<b>20,000 TO 35,000</b> SILAGE 30 45 K ESTABLISHED	<b>35,000 TO 75,000</b> SILAGE 45 80 K ESTABLISHED	<b>65,000 TO 90,000</b> SILAGE 80 95 ESTABLISHED
