

## MaxTwo (195/134)

**MaxTwo** is a modern hybrid designed to improve on the most reliable Maximus. With improved Silage Yield and significantly better grain yield in this 100 CRM class, an improvement on industry standards. It is recommended for grain, double purpose, and silage cropping when high starch/ high ME is important. MaxTwo has fast dry-down, allowing to reach timely silage harvest in cooler summer seasons, and earlier grain harvest with reduced risk of grain drying cost. Recommended for quick grain or silage production when planting maize after canola or other winter crops.

Best grown from Victoria through to Tasmania and Western Australia, under high populations and growing inputs.

Growers seeking a reliable, high yielding, excellent standability and disease tolerant package in a quick-maturing maize hybrid, should be growing **MaxTwo**. Producing high quality 'starchy' feed grain/silage end product.

<b>Plant Type:</b>
<b>100 Days CRM Quick Grain or Silage</b>
<b>Yield Potential:</b>
<b>High end yields with an excellent disease package.</b>
<b>Plant Height:</b>
<b>Tall plant with large root structure for high WUE.</b>
<b>Grain Type:</b>
<b>Dent x Dent highly digestible feed grain. High Starch content in grain and silage.</b>
<b>General Comments:</b>
<b>Consistent and high yields</b>

### PLANTING POPULATIONS

Dryland below 600mm	Dryland above 600mm	Full Irrigation
<b>25,000 TO 40,000</b> (SILAGE 30-45 K) ESTABLISHED	<b>40,000 TO 75,000</b> (SILAGE 45-85 K) ESTABLISHED	<b>75,000 TO 110,000</b> (SILAGE 85-110 K) ESTABLISHED
