

Brutus

Brutus from HSR Seeds is a 105 day soft feed/silage corn. **Brutus** is a hybrid that has extremely high water use efficiency and exceptional yield for its maturity. It has an early-season growth habit that allows versatility and flexibility in sowing and harvest. It is designed for the maize grower who wants a crop that stands well, has a 'Brut' of cob, with an excellent silage yield/quality or high yielding stockfeed maize grain.

Best grown from all over various environments throughout Australia and NZ.

Growers looking for a reliable, high yielding, excellent disease tolerant and standability package in an early-maturing maize, should be growing Brutus. Producing high quality "starchy" feed grain and silage yields. Farmers that want a stable hybrid that has performed exceptionally well across quicker environments in trialling should look at Brutus.

Plant Type:
105 CRM Silage or Grain
Yield Potential:
Excellent yields with unbelievable disease package.
Plant Height:
Tall plant with large root structure for high WUE.
Grain Type:
Dent x Dent highly digestible feed grain. High Starch content in grain and silage.
General Comments:
Solid yields under various conditions.

PLANTING POPULATIONS

<p>Dryland below 600mm</p> <p>20,000 to 35,000 (SILAGE 30-45 K) Established</p>	<p>Dryland above 600mm</p> <p>35,000 to 70,000 (SILAGE 45-85 K) Established</p>	<p>Full Irrigation</p> <p>70,000 to 95,000 (SILAGE 85-100 K) Established</p>
