

Nero IT

Introducing HSR Seeds 112 day CRM imi-tolerant corn. With a greatly improved yield for its maturity, **Nero IT** is the fastest maturing maize on the Australian and New Zealand market with imi-herbicide tolerance.

Can be grown from Southern QLD to Central VIC and WA. Growers seeking a reliable, high yielding, excellent standability and stress tolerance in a mid-maturing maize hybrid, producing high quality 'Prime' grain and silage yields. Has fantastic 'plasticity' or the ability to be adaptable to the environment it is grown.

The flexibility in **Nero IT**, allows you to apply 'Lightning® Herbicide' over the plant for excellent and broad post-emergent broadleaf and grass weed control (Please read the label). **Nero IT** also allows you to go into double-cropping or re-cropping situations where you have soil residues of imi-herbicides.

Plant Type:
112 Days CRM Grain and Silage
Yield Potential:
Excellent top end yields with great plasticity.
Plant Height:
Tall and straight plant structure.
Grain Type:
Large, High Starch, Dent x Flint bright yellow kernels. Ability to go 'Prime' quality for export.
General Comments:
Imazethapyr/Imazapyr tolerant. Zero plant-back interval.
