

Obelix

An impressive early silage and grain option.

Quick feed grain and silage with rapid drydown, ideal for areas of shorter growing period or where you need a quicker widely adaptable variety.

Obelix is a strong, robust plant with exceptional vigour, cold tolerance and yield ability.

A very good grain variety for maturity.

Watch rapid dry-down for silage as it can catch you slightly unaware.

Fast grain dry-down provides harvest earlier than some quicker hybrids.

Strong erect plant with a large ear that suits both grain and silage production. Vertical leaf structure to handle higher populations.

Strong and robust agronomic package for disease resistance.

Plant Type:
90 Days CRM Quick Grain or Silage
Yield Potential:
High end yields.
Plant Height:
Tall plant with a vertical leaf and large root structure for high WUE.
Grain Type:
Dent x Dent highly digestible feed grain. High Starch content in grain and silage.
General Comments:
Consistent and high yields. Rapid dry-down.

PLANTING POPULATIONS

Dryland below 600mm	Dryland above 600mm	Full Irrigation
25,000 to 40,000 (SILAGE 30-45 K) Established	40,000 to 75,000 (SILAGE 45-85 K) Established	75,000 to 110,000 (SILAGE 85-110 K) Established
